

Assessment-first cybersecurity and compliance support that converts findings into prioritized remediation, SOC uplift, and measurable security outcomes. enLight10 helps small businesses, public-sector organizations, DIB contractors, and mission teams understand risk, organize evidence, improve operations, and apply Watchtower AI-enabled workflows without rip-and-replace.

Core Capability Areas

Cybersecurity & Compliance Assessments - Security posture, maturity, and gap assessments - Policy, incident response plan, and evidence review - NIST CSF, NIST 800-53/171, CMMC and SOC 2 readiness - Executive risk summaries, risk registers, remediation roadmaps	Watchtower AI-Enabled Workflow Support - Assessment intake, evidence organization, finding generation - Compliance mapping, control explanation, reporting acceleration - Triage, remediation tracking, and executive visibility workflows - Augments analysts and leaders; preserves professional judgment
SOC, MSSP & Detection Engineering Advisory - SOC maturity assessment and operating model design - SIEM/detection tuning across Sentinel, Splunk, Elastic/OpenSearch - Alert triage workflows, escalation paths, playbooks, and metrics - MSSP enablement and partner-delivered managed security support	OT/ICS Cybersecurity Readiness - OT asset, architecture, and segmentation assessment support - ICS/OT policy and incident response planning - Risk review for remote, wireless, third-party access, dependencies - Advisory-led support with specialized partners for OT testing

Assessment-to-Action Delivery Model

1. Intake Business context, systems, compliance drivers, policies, evidence, risk goals	2. Assess Security posture, control gaps, exposure, process maturity, constraints	3. Map Findings mapped to NIST/CMMC/SOC 2, risk register, evidence gaps	4. Prioritize Quick wins, high-risk fixes, roadmap, owners, outcomes	5. Improve SOC uplift, remediation tracking, playbooks, Watchtower workflows

Differentiators & Primary Use Cases

Differentiators Practitioner-led: 15+ years of DoD, federal, and defense-contractor cybersecurity experience across SOC operations, incident response, compliance, OT/ICS, and security architecture. Assessment-first: 5-step Intake → Assess → Map → Prioritize → Improve model that turns risk discovery, evidence review, and control gaps into prioritized remediation before tool selling. Integration-friendly AI: Watchtower accelerates 4 core workflows — analysis, mapping, reporting, and remediation tracking — while preserving human review and existing-tool context.	Primary Use Cases - Small-business cybersecurity baseline, insurance/client readiness - Public-sector and education cyber assessment, policy review, remediation planning - DIB contractors preparing for CMMC, NIST 800-171, and prime expectations - SOC maturity, detection workflow, and incident response program uplift - Prime contractors needing a specialized cyber/compliance assessment partner - OT/ICS environments needing advisory-led cyber readiness and partner-supported testing - Teams seeking AI-assisted cyber/compliance workflows without replacing tools - Leaders needing executive-ready risk reporting, roadmaps, and evidence organization

Representative Service Packages

Package	Outcome	Typical Deliverables
Cyber Baseline Assessment	Know current risk and top fixes	Intake, evidence review, risk register, executive summary, prioritized roadmap
Compliance Readiness Sprint	Prepare for audits, RFPs, customer due diligence	Control mapping, policy/IRP review, evidence gaps, remediation plan
SOC / MSSP Uplift	Improve detection, triage, and response operations	SOC maturity review, playbooks, escalation model, metrics, detection/alert tuning advisory
